Supplementary Information

Help Restore Brazil's Governance of Globally Important Ecosystem Services

Authors: Carolina Levis*, Bernardo M. Flores*, Guilherme G. Mazzochini, Adriana P. Manhães, João Vitor Campos-Silva, Pablo Borges de Amorim, Nivaldo Peroni, Marina Hirota, Charles R. Clement & 1,230 signatories

* Co-first-authorship, both contributed equally to this work. Correspondence to: carollevis@gmail.com; mflores.bernardo@gmail.com.

Supplementary Table 1 - Consequences of policy changes.....	02-05
Supplementary Table 2 - List of Signatories.....	06-46
Supplementary Text – Portuguese version.....	47-50

Supplementary Table 1.

(A) Consequences of the Environmental and Indigenous Policy Changes on Biodiversity and Ecosystem Services of Brazil, which have global importance, and (B) Most important UN Sustainable Development Goals (SDGs) and Targets under threat. Credits of UN SDG icons to United Nations (UN/SDG).

(A)

	Policy Changes	References	Main local consequences
<p style="text-align: center;">MAIN ENVIRONMENTAL AND INDIGENOUS POLICY CHANGES</p>	<p style="writing-mode: vertical-rl; transform: rotate(180deg);">Environmental</p> <p>Brazilian Forest Service from Ministry of Environment (MMA) to Ministry of Agriculture (MAPA). Ministry of Environment (MMA) obligated to articulate with MAPA regarding public forest management.</p>	<p>MP n° 870/2019 Decree (9667/19)</p>	<p>Agricultural sector is now responsible for managing native vegetation on private lands (Law n° 12.651/2012) and public native forests (Law n° 11.284/2006).</p>
		<p>MP n° 870/2019 Decree (9666/19)</p>	<p>Water related policies and regulations are now disconnected from the Environmental Policy, threatening water resources.</p>
	<p>410 pesticides already authorized (239 were authorized in first six months of Government, 31 % of them are banned in EU and 43 % are considered highly toxic).</p>	<p>Greenpeace Report</p>	<p>Higher risks of contamination of water bodies, food, humans, animals (pollinators) and riparian areas.</p>
	<p>23 % budget cut for the Ministry of Environment ^a.</p>	<p>Decree (9741/2019)</p>	<p>Weaken governmental agencies responsible for environmental control and conservation, climate change mitigation and adaptation, protection and management of natural resources, and avoiding natural disasters.</p>
	<p>Creation of the Environmental Conciliation Nucleus, an agency with power to annul environmental fines.</p>	<p>Decree (9760/2019)</p>	<p>May stimulate environmental crimes and illegal activities (e.g., mining and logging).</p>

	<p>Interruption of Ecological-Economical Zoning (ZEE), instrument of the National Policy of the Environment regulated by Decree n° 4.297/2002 to promote territorial environmental planning.</p>	MP n° 870/2019	Reduced compatibility between socio-economic development and environmental protection. May lead to over-exploitation of natural resources.
	<p>National councils related to Environmental Policies were extinguished or reduced (e.g., two committees that integrated the National Contingency Plan for oil-in-water pollution incidents, and National Council of Rural Sustainable Development were extinguished and the National Council of Environment was reduced substantially).</p>	Decree (9759/19, 9806/19)	Omission in face of major environmental disasters, such as Northeast Brazil oil spill. Endangers environmental policies that enable international funding for conservation, which may also lead to more deforestation and ecosystem degradation.
	<p>The Secretary of Climate Change, Secretary of Institutional Articulation and Environmental Citizenship, and Secretary of Extractivism and Sustainable Rural Development were extinguished.</p>	Decree (9667/19, 9672/19)	Weaken the historical participation in international climate policies; Loss of articulation among the Government, States and Municipalities; Reduced actions for sustainable development in rural areas.
	<p>The Ministry of Environment appointed militaries to the main positions and plan to create a working group to reevaluate the 334 Brazilian Protected Areas.</p>		Protected Areas will suffer reductions, threatening endangered species.
	<p>Intention to review the MP 867 that alters the Forest Code.</p>		Lands illegally deforested in the past will not need to be restored and deforestation may increase.
Indigenous	<p>FUNAI suffers 90% budget cut^b.</p>	Decree (9711/2019)	Increase in illegal activities inside indigenous reserves.
	<p>The National Commission of Indigenous Policy and the National Commission of Indigenous Education were extinguished.</p>	Decree (9759/19)	Reduction of indigenous participation in public policies regarding indigenous peoples resulting in reserve area loss, illegal logging and mining.

(B)

	Ecosystem services affected	UN SDGs affected	UN Sustainable Development targets affected
<p style="text-align: center;">ECOSYSTEM SERVICES AND UM SUSTAINABLE DEVELOPMENT GOALS</p>	<p><u>Provisioning</u>: food and crop genetic diversity. <u>Regulating</u>: pollination.</p>		<p>2.3 double the agricultural productivity of indigenous people, including secure and equal access to land; 2.4 ensure sustainable food production systems; 2.5 maintain genetic diversity of cultivated plants.</p>
	<p><u>Provisioning</u>: medicine. <u>Regulating</u>: disease control.</p>		<p>3.9 substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water and soil pollution and contamination.</p>
	<p><u>Provisioning</u>: timber and non-timber products.</p>		<p>12.1 implement the 10-year framework of programmes on sustainable consumption and production, all countries taking action, with developed countries taking the lead, taking into account the development and capabilities of developing countries</p>
	<p><u>Provisioning</u>: freshwater. <u>Regulating</u>: erosion control and water purification.</p>		<p>6.6 protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers and lakes.</p>
	<p><u>Regulating</u>: climate regulation, carbon sequestration, natural hazard control.</p>		<p>13.B promote mechanisms for raising capacity for effective climate change-related planning.</p>
	<p><u>Biodiversity</u>: all aquatic species for their inherent value and their importance for ecosystem services provision.</p>		<p>14.2 sustainably manage and protect marine and coastal ecosystems; 14.4 regulate harvesting and end overfishing, illegal fishing and destructive fishing practices and implement science-based management plans.</p>
	<p><u>Biodiversity</u>: all terrestrial species for their inherent value and their importance for ecosystem services provision.</p>		<p>15.1 ensure the conservation, restoration and sustainable use of ecosystems and their services; 15.2 halt deforestation and restore degraded forests; 15.5 reduce the loss of biodiversity and prevent the extinction of threatened species; 15.A mobilize and significantly increase financial resources from all sources to conserve and sustainably use biodiversity and ecosystems; 15.B mobilize significant resources from all sources and at all levels to finance sustainable forest management.</p>

	<p><u>Cultural services:</u> cultural values, cultural identity.</p> <p><u>Cultural services:</u> cultural heritage, spiritual and aesthetic services.</p> <p><u>Cultural services:</u> inspirational values, spiritual and aesthetic services.</p>	  	<p>10.3 eliminate discriminatory laws, policies and practices; 10.2 empower and promote the social, economic and political inclusion of all; 10.4 adopt social protection policies to achieve greater equality.</p> <p>11.4 safeguard the world's cultural and natural heritage.</p> <p>16.3 promote the rule of law at the national and international levels and ensure equal access to justice for all.</p>

Ajude a Restaurar a Governança Brasileira dos Serviços Ecosistêmicos de Importância Global

Para o Editor - Desde 2005, políticas de conservação bem-sucedidas tornaram o Brasil um exemplo global de governança ambiental, em especial com a expansão de Áreas Protegidas e demarcação de Terras Indígenas, o desenvolvimento de sistemas avançados de monitoramento para detectar a perda de vegetação e a intervenção nas cadeias de fornecimento de soja e carne bovina¹. Agora, o governo do presidente Jair Bolsonaro está dismantando as políticas socioambientais do país², comprometendo a governança de serviços ecosistêmicos de importância global³ (Tabela Suplementar 1).

O Brasil é um país com uma imensa responsabilidade para com a humanidade. Primeiro, porque contém a maior parte da floresta Amazônica, um elemento crítico para estabilizar o sistema climático da Terra⁴. Segundo, seus ecossistemas terrestres bem conservados armazenam imensas quantidades de carbono e 12% dos recursos hídricos globais⁵. Terceiro, seus ecossistemas terrestres e marinhos abrigam 10% da biodiversidade do mundo⁵, incluindo muitas espécies úteis para alimentação, medicamentos e construção (Fig. 1). Além disso, a diversidade cultural do Brasil inclui mais de 300 grupos étnicos que preservam conhecimento ecológico indígena ancestral⁵ e historicamente têm prestado serviços essenciais para as sociedades^{5,6}.

Para ajudar o Brasil a restaurar um sistema de governança participativo e resiliente, sugerimos três linhas de ação prioritárias, alinhadas com a Convenção sobre Diversidade Biológica (Metas de CDB, Aichi), os Objetivos de Desenvolvimento Sustentável das Nações Unidas (ODS) e o Acordo de Paris.

Desenvolver agroindústria sustentável.

A perda de biodiversidade e ecossistemas no Brasil é impulsionada principalmente pela produção de commodities, o que implica que o setor de agronegócios tem um papel central em determinar o destino dos ativos ecossistêmicos do país⁷. O aumento na produtividade sem perda adicional de ecossistemas pode ser alcançado com (i) a promoção do uso estratégico de incentivos para expandir os sistemas de produção baseados na biodiversidade e a agricultura de baixo carbono, (ii) a eco-certificação, (iii) o fortalecimento dos sistemas públicos locais para o desenvolvimento agropecuário sustentável, (iv) o fortalecimento dos sistemas públicos locais de controle sobre o uso de pesticidas, (v) o investimento em ciência, biotecnologia e inovação baseado na diversidade biológica nativa.

Proteger e restaurar ecossistemas terrestres, de água doce e marinhos.

É essencial investir na proteção de ecossistemas bem conservados e na restauração de ecossistemas degradados para aumentar os ativos ecossistêmicos^{5,6}. Isso requer (i) a efetiva implementação, manutenção e expansão das áreas protegidas, (ii) o fortalecimento da resiliência dos ecossistemas e das sociedades locais às mudanças globais, (iii) o fortalecimento do sistema público de gestão socioambiental em todos os níveis, para se fazer cumprir as leis ambientais vigentes, (iv) a promoção do manejo sustentável da biodiversidade e dos ativos ecossistêmicos pelas comunidades locais dentro e fora de áreas protegidas, (v) o desenvolvimento de cadeias

produtivas e cadeias de valor de ativos da biodiversidade manejados localmente, com logística baseada em infraestrutura sustentável para conectar comunidades remotas aos mercados.

Fortalecer os direitos dos povos indígenas e tradicionais.

Os povos indígenas e comunidades tradicionais vêm interagindo com seus ambientes há milênios, desempenhando um papel fundamental na garantia da proteção dos ecossistemas^{5,6}. Manter sua participação na governança ambiental requer (i) a demarcação constitucional e da desintrusão das terras indígenas e tradicionais, (ii) o fortalecimento da resiliência dos sistemas de produção de alimentos indígenas, (iii) a proteção das culturas e seu conhecimento ecológico local, (iv) a inclusão efetiva dos povos indígenas e tradicionais na tomada de decisões e na gestão pública socioambiental, (v) o fortalecimento das políticas públicas para povos indígenas e comunidades tradicionais.

As conseqüências globais do recém degradado sistema de governança brasileiro implicam que todas as partes interessadas compartilham um interesse comum: tornar os ecossistemas brasileiros resilientes. Os mercados internacionais podem exercer pressão sobre como os agricultores produzem commodities no Brasil¹, ajudando a colocar o país na tendência global da agricultura sustentável⁸. Os países podem apoiar as empresas comprometidas com os ODS por meio do uso estratégico de incentivos, enquanto os governos estaduais e municipais no Brasil podem estimular a produção agrícola sustentável e baseada na biodiversidade, atraindo investimentos externos⁹. Oportunidades também estão nas novas conexões políticas, como na Coalizão Brasil Clima, Florestas e Agricultura (www.coalizaobr.com.br), bem como nas Frentes Parlamentares, Ambientalista (222 parlamentares), Mista em Defesa pelo Direito dos Povos Indígenas (237 parlamentares), e Mista de Ciência, Tecnologia, Pesquisa e Inovação (207 parlamentares). Entre os brasileiros, 91% desejam políticas mais fortes para a conservação da

natureza⁹, o que demonstra que a integração de políticas com as metas globais, como os ODS e as metas de Aichi, é de interesse público. Esforços científicos recentes também podem ajudar a impulsionar a governança participativa, como o projeto MapBiomass, a Plataforma Brasileira de Biodiversidade e Serviços Ecossistêmicos (BPBES)⁵ e *Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services (IPBES)*⁶, que avaliam continuamente o status da biodiversidade e dos ativos ecossistêmicos.

Os 1230 signatários deste artigo, que representam uma ampla seção da comunidade científica brasileira, assim como membros dos povos indígenas e comunidades tradicionais do Brasil, pedem aos parceiros comerciais internacionais, governos estaduais e municipais, membros do parlamento e cidadãos preocupados que pressionem o governo brasileiro a reverter sua agenda destrutiva e apoiar esta agenda construtiva, antes que a humanidade perca serviços críticos dos ecossistemas.
